00 EXECUTIVE SUMMARY

Global vision of the profile and professional positioning

Ramón Alberto Curbalán Vega brings together three professional specialties complementary: hospitality and F&B operations management, technology and applied systems, and sport/nutrition/performance. Your profile is characterized by integrating people, processes, data and execution to turn objectives into measurable results.

HOSPITALITY & OPERATIONS

23+ years of experience professional with experience in 5★ and 5★ GL environments. F&B;, banquets, events, catering, logistics, service, purchasing, inventory and team leadership.

TECHNOLOGY & SYSTEMS

Training and projects in systems, networks, security, databases, Big Data, AI, web development, automation and agile management.

SPORT & PERFORMANCE

personal training, directed activities, nutrition, swimming, wellness and design health experiences and performance.

Current positioning

Current position	FB Banquet Manager - Capvermell Gran Hotel S.L.U. (March 2025 - present).
Previous experience	Banquets & Events Director, Restaurant and Banqueting Manager, Banquet Manager and operational leadership responsibilities.
Location	Mallorca. Primarily seeking professional opportunities on the island.
Target areas	F&B Management / Banquets & Events / Operations; Sports Management / Coordination; Applied technology and hybrid transformation roles.

Transversal skills

- Team leadership, interdepartmental coordination and operational decision making.
- Project planning, schedules, resources, monitoring, incidents and closure.
- Control of KPI, profitability, productivity, customer satisfaction and continuous improvement.
- Digitization, automation, security, databases, AI and management tools.
- Training, nutrition, habits and support aimed at performance objectives.

01

HOSPITALITY, F&B; AND EVENTS

Operational management, banquets, catering and customer experience

Main specialty

Consolidated track record in high-level hospitality, especially in F&B, banquets and events. The professional focus is on building reliable operations: precise planning, equipment sized to demand, consistent service, economic control and coordination between kitchen, reception, events, purchases and operations.

Key Responsibilities and Capabilities

• Designing, reading and implementing BEOs.	• Purchasing, inventories, service equipment and logistics.
• Layouts, setups, schedules and workflows.	• Service supervision and 5★ / 5★ standards GL.
• Kitchen - living room - events coordination - reception.	• Customer service and resolution of incidents.
• Staffing for peak demand and staffing ratios.	• Closing procedures, consumption, productivity and profitability.

Operating cycle applied to events and F&B;

1. PLANNING	Objective, BEO, layout, timings, volumes and risks.
2. RESOURCES	Team, service equipment, purchasing, stations, bars and BOH.
3. EXECUTION	Briefing, service sequence and minute-by-minute coordination.
4. MONITORING	Quality, timings, consumption, incidents and customer experience.
5. CLOSING	Clearing, inventory, consumption, incidents and costs.
6. IMPROVEMENT	Debriefing, KPIs, lessons learned and updating standards.

KPI and control

- Guest/customer satisfaction and compliance with standards.
- Average ticket and F&B income.;
- Food cost, consumption, purchases and inventory.
- Profitability per event and team productivity.
- Operational incidents, times and quality of closure.

02

TECHNOLOGY, SYSTEMS AND AUTOMATION

Technical training, applied development and digital transformation

Applied technological profile

The technological specialty is supported by technical training and real projects developed to solve specific needs: authentication, databases, automation, web applications, security, digital content and deployments. The objective is not to separate technology from operation, but to use it to make processes simpler, measurable and scalable.

SYSTEMS & NETWORKS

departmental networks, virtualization, addressing, NAT/Bridged, VPN, monitoring and diagnosis.

SECURITY

Computer security, Nmap, good access practices, OAuth, permissions control and production environments.

DATA & AI

Big Data and AI, databases, information analysis, automation and assistants integrated into applications.

Technologies and environments worked

DEVELOPMENT	HTML, CSS, JavaScript, Python, FastAPI, SPA/PWA applications and client-side logic.
DATABASES	PostgreSQL / Supabase, SQLite / SQLAlchemy, MySQL, SQL Server and MongoDB.
INFRASTRUCTURE	Windows, Linux, Kali, virtual machines, VirtualBox/VMware, networks, VPN and monitoring.
CLOUD / DEPLOYMENT	Git, GitHub, GitHub Pages, Vercel, domains, hosting, OAuth and deployment of production.
MANAGEMENT	Agile Project Management, Scrum, iterative planning and deliverable control.

Representative technological projects

IT Portfolio

Technical portfolio with a focus on systems, data, cybersecurity, development, networks and projects.

OpoStudy

TAI preparation platform with tests, simulations, practical exercises, statistics, error tracking and content.

Farmagend 24/7

Concept of a hybrid physical-digital center with robotic automation, e-commerce, app and applied AI.

Chetesai Fitness+

Private application with Supabase, authentication, Google OAuth, training and nutrition content, dashboard AI professional and assistant.

03

SPORTS, NUTRITION AND PERFORMANCE

Training, habits, well-being and support

sports specialty

Experience and training oriented towards training, health and performance, with the ability to work both with individual users and with groups and groups of different ages. The focus combines exercise planning, nutrition, habits, tracking and motivation.

TRAINING

personal trainer, functional training, strength, directed activities and planning by objectives.

NUTRITION & HABITS

Training as a technician nutritionist, education habits, tracking and construction of plans integrated.

BUS & WATER

Swimming for different ages, lifeguarding, Pilates, yoga, tai chi and work with third age.

Chetesai Fitness+

Own project that materializes this specialty in a private nutrition platform, training and habits. Integrates an interface for clients and a professional panel, library of exercises, monitoring, nutritional plans, audiovisual content and digital assistance.

Working model

ASSESSMENT	Objectives, context, habits, experience, availability and starting point.
PLANNING	Training and nutrition tailored to the person, with progressions and priorities.
EXECUTION	Clear sessions, technique, adherence and adapting volume/intensity.
MONITORING	Sleep, movement, strength, nutrition, recovery, energy, stress and frequency cardiac.
OPTIMISATION	Regular reviews, adjustments and education to develop autonomy.

Professional positioning in sport

- Sports direction or coordination.
- Personal training and program design.
- Management of fitness facilities and services.
- Programs for senior citizens, well-being and inclusion.
- Hybrid sports + technology + nutrition projects.

04 PROJECTS AND DIGITAL ECOSYSTEM

Own initiatives that connect the three specialties

CHETESAÍ FITNESS+

Sports + technology

Nutrition, training and platform habits with professional panel, Supabase, OAuth, gallery of exercises, multimedia content and AI assistant.

OPOSTUDY

Technology + training

Application for TAI preparation with drills, questions, practical, bug tracking, statistics and technical content.

FARMAGEND 24/7

Innovation + automation

Hybrid physical-digital center with dispensing automated, robotic arm, app, e-commerce, AI and smart inventory.

CATERING MALLORCA

Hospitality + events

Catering concept for private estates in Mallorca with equipment structure, transport, material, menu, drinks and branding.

FITNESS BUS

Sport + operations

Itinerant service of functional classes, Pilates, yoga and the elderly with a model reservations, bonuses and digital payments.

PROFESSIONAL PORTFOLIOS

Personal brand + technology

Specialized technology and sports portfolios and hospitality, in addition to the comprehensive portfolio Human - Systems - Performance.

05 TRAINING AND CERTIFICATIONS

Technical base, project management, hospitality and sports

HOSPITALITY AND OPERATIONS

- HOTR064PO.
- HOTR040PO.
- Training and equivalences linked to HOTR0409.
- Applied experience in banquet management, catering, events and F&B operations.;

TECHNOLOGY AND SYSTEMS

- IFCT0410 - Departmental Networks.
- IFCT101PO - Computer Security.
- IFCT159 - Big Data and Artificial Intelligence.
- Training in networks, electronics, systems, databases and virtualized environments.

PROJECT MANAGEMENT AND DIGITALIZATION

- ADGD347PO - Agile Project Management.
- ADG348PO - Agile Project Management / Scrum.
- Digital Generation SMEs - EAE, 375 hours.
- Academic works and projects in strategic management, Scrum, Kanban and digital transformation.

SPORTS, NUTRITION AND WELL-BEING

- Training as a nutritionist technician.
- Personal trainer.
- Technician in multipurpose rooms.
- Pilates, yoga and tai chi instructor for seniors.
- Lifeguard and swimming experience for different ages.
- Experience in directed activities: functional, cycling and Pilates.

06

METHODOLOGY AND VALUE PROPOSAL

How Human - Systems - Performance are integrated

The same logic for three disciplines

The differential advantage of the profile does not only consist of accumulating three areas of knowledge, but in using the same mental structure to solve problems in different contexts: understanding people, design work systems and measure performance.

HUMAN

Leadership, communication, service, experience client, coaching, motivation and adaptation to people and teams.

SYSTEMS

Processes, planning, data, technology, security, automation, documentation and control.

PERFORMANCE

KPI, productivity, profitability, quality, health, adhesion, recovery and continuous improvement.

Work framework

1. ANALYSE	Context, objectives, constraints, risks and available data.
2. DESIGN	Solution, experience, processes, architecture and success criteria.
3. PLAN	Resources, schedule, responsibilities, priorities and standards.
4. EXECUTE	Coordination, communication, operational discipline and adaptation.
5. MEASURE	KPIs, quality, incidents, behaviour, feedback and outcomes.
6. OPTIMISE	Learning, automation, simplification and continuous improvement.

Application by specialty

HOSPITALITY	Consistent operations, coordinated teams, premium service, control economic and customer experience.
TECHNOLOGY	Useful, secure and maintainable systems; process automation and data converted into decisions.
SPORT	Realistic programmes, monitoring, adherence, progression and habit education sustainable.

Professional goal

Develop positions of responsibility in Mallorca where operational management, applied technology and performance management, with special interest in F&B;/operations, sports coordination and digital transformation.
