EVENT 2.0 FOR LAUNCH OF A CHRISTMAS PERFUME

“Noël Étoilé · The Night of Fragrance”

1. Proposal: a hybrid and sensory event

For the Christmas launch of a perfume, I propose a hybrid 2.0 event: a reduced and exclusive in-person gala, broadcast live and interactively for thousands of people who follow her from home. The main challenge of a perfume is that the smell doesn't travel over the internet, so the event solves that problem by sending a sensory box to online attendees.

A 2.0 event is not simply recording an act and uploading it to the network. It is an event in which the public participates, gives their opinion, shares and buys in real time, and whose journey begins weeks before and ends weeks after the day of the celebration.

The piece lasts 20 seconds and uses a narrative visual without voiceover, supported by film music and short product texts to reinforce the premium, Christmas and sensory character of Maison Aurelia.

▶ WATCH / PLAY THE OFFICIAL VIDEO

Clicking on the image or button directly opens the official video of release on YouTube.

Application within the 2.0 experience. The same piece is used in the living room digital wait, in the simultaneous premiere of the live show and as campaign content for Instagram, TikTok, YouTube and the landing page. This way the video doesn't work only as a presentation of the product, but as a transversal asset of communication before, during and after the event.

12. Conclusion

«Noël Étoilé» combines the best of both worlds: the closeness and glamor of an in-person event, and the scope, interaction and measurement of a digital event. The box sensory turns the main limitation of the perfume into the most memorable element of the experience, and the subsequent monitoring allows you to transform the emotion of the direct sales during the Christmas campaign.
