EXECUTIVE SUMMARY

Professional profile and career positioning

Overview

Ramón Alberto Curbalán Vega brings together three complementary specialisms: hospitality and F&B operations management, applied technology and systems, and sport, nutrition and performance. He connects people, processes, data and delivery to turn objectives into measurable results.

HOSPITALITY & OPERATIONS

23+ years of experience, including 5★ and 5★ Grand Luxury hotels. F&B, banqueting, events, restaurants, logistics, service, purchasing, inventory and team leadership.

TECHNOLOGY & SYSTEMS

Training and projects in systems, networks, security, databases, Big Data, AI, web development, automation and agile management.

SPORT & PERFORMANCE

Personal training, group classes, nutrition, swimming, well-being and the design of health and performance experiences.

CURRENT POSITIONING

Current role: FB Banquet Manager – Capvermell Gran Hotel S.L.U. (March 2025 – present). · Target areas: F&B management / Banqueting & Events / Operations; Sports management / Coordination; Applied technology and hybrid transformation roles.

01

HOSPITALITY, F&B AND EVENTS

Operations management, banqueting, restaurants and customer experience

Main specialism

An established career in premium hospitality, particularly F&B, banqueting and events. The focus is on reliable operations: precise planning, staffing matched to demand, consistent service, financial control and coordination across kitchen, reception, events, purchasing and operations.

Creating, interpreting and delivering BEOs.

Layouts, setups, schedules and workflows.

Coordinating kitchen, service, events and reception.

Staffing for demand peaks and service ratios.

Operations cycle for events and F&B

1. PLANNING: objectives, BEO, layout, timing, volumes and risks.
2. RESOURCES: team, equipment, purchasing, stations, bars and BOH.
3. DELIVERY: briefing, service sequence and real-time coordination.
4. MONITORING: quality, timing, consumption, incidents and guest experience.
5. CLOSE-OUT and 6. IMPROVEMENT: inventory, costs, KPIs and lessons learned.

Purchasing, inventory, equipment and logistics.

Supervising service and 5★ / 5★ GL standards.

Customer service and incident resolution.

Close-out, consumption, productivity and profitability.

02

TECHNOLOGY, SYSTEMS AND AUTOMATION

Technical training, applied development and digital transformation

Applied technology profile

This specialism combines technical training with real projects that address specific needs: authentication, databases, automation, web applications, security, digital content and deployment.

SYSTEMS & NETWORKS

Departmental networks, virtualisation, addressing, NAT/Bridged, VPN, monitoring and diagnostics.

SECURITY

IT security, Nmap, access best practices, OAuth, permission management and production environments.

DATA & AI

Big Data and AI, databases, information analysis, automation and assistants integrated into applications.

Technologies and environments used

DEVELOPMENT: HTML, CSS, JavaScript, Python, FastAPI, SPA/PWA.

DATABASES: PostgreSQL / Supabase, SQLite / SQLAlchemy, MySQL, SQL Server, MongoDB.

INFRASTRUCTURE / CLOUD: Windows, Linux, Kali, virtual machines, Git, GitHub Pages, Vercel, domains and OAuth.

MANAGEMENT: Agile Project Management and Scrum.

03

SPORT, NUTRITION AND PERFORMANCE

Training, habits, well-being and support

Sports specialism

Experience and training in exercise, health and performance, working with individuals and groups of different ages. The approach combines exercise planning, nutrition, habits, progress tracking and motivation.

TRAINING

Personal training, functional training, strength, group classes and goal-based planning.

NUTRITION & HABITS

Training as a nutrition technician, habit education, progress tracking and integrated plans.

GROUPS & AQUATICS

Swimming across age groups, lifeguarding, Pilates, yoga, tai chi and activities for older adults.

Working model

ASSESS · PLAN · EXECUTE · TRACK · OPTIMISE. Chetesaí Fitness+ puts this specialism into practice through a private nutrition, training and habits platform with a client interface and professional dashboard.

04

PROJECTS AND DIGITAL ECOSYSTEM

Personal initiatives connecting the three specialisms

CHETESAÍ FITNESS+

Sport + technology

Nutrition, training and habits platform with a professional dashboard, Supabase, OAuth, exercise library, multimedia content and AI assistant.

OPOSTUDY

Technology + learning

TAI exam preparation app with mock exams, questions, practical exercises, error tracking, statistics and technical content.

FARMAGEND 24/7

Innovation + automation

Hybrid physical and digital centre with automated dispensing, a robotic arm, app, e-commerce, AI and smart inventory.

CATERING MALLORCA

Hospitality + events

Catering concept for private estates in Mallorca, covering teams, transport, equipment, menus, drinks and branding.

FITNESS BUS

Sport + operations

Mobile functional training, Pilates, yoga and older-adult classes with booking, class passes and digital payments.

PROFESSIONAL PORTFOLIOS

Personal brand + technology

Specialist technology, sport and hospitality portfolios, alongside the integrated Human – Systems – Performance portfolio.

05

TRAINING AND CERTIFICATIONS

Technical foundations, project management, hospitality and sport

HOSPITALITY AND OPERATIONS

HOTR064PO. · HOTR040PO. · Training and equivalencies linked to HOTR0409. · Applied experience in banqueting management, restaurants, events and F&B operations.

TECHNOLOGY AND SYSTEMS

ADGD347PO – Agile Project Management. · ADG348PO – Agile Project Management / Scrum. · Generación Digital PYMES – EAE, 375 hours. · Academic work in strategic management, Scrum, Kanban and digital transformation.

SPORT, NUTRITION AND WELL-BEING

Training as a nutrition technician. · Personal trainer. · Fitness studio technician. · Pilates, yoga and tai chi instructor for older adults. · Lifeguard and swimming experience across age groups.

06

METHODOLOGY AND VALUE PROPOSITION

Connecting Human – Systems – Performance

One approach across three disciplines

The strength of this profile comes from applying a shared approach across different contexts: understanding people, designing working systems and measuring performance. The three areas of expertise support each other in solving practical problems.

HUMAN

Leadership, communication, service, customer experience, coaching, motivation and adaptation to individuals and teams.

SYSTEMS

Processes, planning, data, technology, security, automation, documentation and control.

PERFORMANCE

KPIs, productivity, profitability, quality, health, adherence, recovery and continuous improvement.

Working framework

1. ANALYSE · 2. DESIGN · 3. PLAN · 4. EXECUTE · 5. MEASURE · 6. OPTIMISE.

Applied by specialism: HOSPITALITY – consistent operations and premium service. TECHNOLOGY – useful systems and automation. SPORT – realistic programmes, progress tracking and sustainable habits.

PEOPLE, PROCESSES AND TECHNOLOGY
WITH ONE SHARED DIRECTION.

Operations management, applied technology and human performance follow one approach: analyse, plan, execute, measure and improve. Customer experience, system reliability and team performance contribute to the same result.
